### Weekly Update – 30 March 2020

Dear colleagues,

We would first and foremost like to thank everyone around the world for their efforts to combat COVID-19. We would also like to thank all who have contributed to and promoted this registry, which we hope will help us better understand the impact of COVID-19 in patients with chronic liver disease and post-liver transplantation.

Given our small numbers, we are not able to draw definitive conclusions about the effect of COVID-19 in patients with liver disease. We hope to provide more granular data in the future.

Submissions to date: 18 cases, 10 women and 8 men, median age 52 years

<b>Liver Condition</b>	<b>Cases</b>	<b>COVID-19 Outcomes</b>	<b>Cases</b>
Cirrhosis*	8	Death	3
Liver transplant	6	Hospitalization*	12
NAFLD	2	Intensive care	3
ALD	1	Invasive ventilation	3
Sarcoidosis	1		

\* median LOS 3 days

\* 3 ALD, 2 HBV, 1 NAFLD, 1 HCV, 1 cholestatic

<b>Comorbidities</b>	<b>Cases</b>	<b>Other Complication</b>	<b>Cases</b>
Diabetes	6	AKI	5
Obesity	5	New coagulopathy	1
Hypertension	4	New ascites/HE	0

We would again like to thank all the contributors and encourage clinicians to continue submitting cases to the registry. We look forward to providing more updates in the future.

Take care,

SECURE-Cirrhosis Team
